Mr Herron,

I read through the opioid settlement guidelines for spending and have come up with several ideas for the Fire Department.

- **CPR training equipment, and Narcan administration training equipment.** This equipment would include CPR mannequins, AED trainers, Airway management training equipment, and Narcan administration training equipment. \$4,554.00
- **Controlled substance securing devices for our ambulances and EMS supply storage areas.** This would allow us to better secure and track the controlled substances that we carry on our ambulances for patient treatment. \$15,814.00
- **Automated CPR devices.** The Auto Pulse is device that is applied to folks in cardiac arrest and performs CPR hands free allowing crews to further treat patient and allows for safety of personnel while travelling to the hospital. 5 units with service agreement \$154,219.45
- **Power stair chairs.** Stair chairs are used to move incapacitated individuals safely from a confined area and up and down stairs. These power stair chairs provide safety from back injuries for our responders who are often moving patients from precarious areas. 3 units with service agreement = \$64,714.55.
- **Disinfecting equipment for Ambulances.** These devices allow for a disinfecting solution to be released in a closed ambulance. The material dries without residue and helps protect crews as well as future patients from the spread of communicable diseases. 4 units @ \$63,766.16.
- **Automatic External defibrillators.** AED's are used to determine if an incapacitated patient is in need of heart defibrillation. These devices are carried on all WFD vehicles so that capability is available as soon as WFD is on scene. We currently have 15 units that are at end of life and in need of replacement. 18 AED's with service agreements = \$89,441.46

- **Ballistic Vests for Responders.** In the current climate in our nation, first responders are subject to violence aimed at them while responding. Often in overdose situations the patients are located in questionable locations which puts our responders at risk. 32 vests @ \$29,035.52
- **EMS slide in attachment for UTV:** This would allow us to use a current UTV to transport a incapacitated victim from a hard to reach area ( example homeless camp emergencies) \$10,289
- **Grand Total \$ 431,833.69**

Respectfully,

James Blazier
